

Electives offered to MBBS Students

Block 1:

Antimicrobial Resistance: Laboratory Perspective

Applications of molecular diagnostics in the diagnosis & management of

Infectious Diseases

Applied Physiology: Clinics, Research and Lifestyle

Blood Bank

Cadaveric dissection: Axilla

Cadaveric dissection: Front of thigh

Cadaveric dissection: Midline structures of neck

Cadaveric dissection: Palm

Cadaveric dissection: Parotid region

Clinical Examination

Cytology

Data analysis made easy using Jamovi

Diagnosis of Tuberculosis: Conventional and automated methods

Drug Development Process

Effective Grant Proposal writing

Fundamentals of Manuscript preparation

Hematology

Histopathology

Introduction to Systematic Reviews

Medical Biochemistry Laboratory Training

Oncopathology

Pharmacovigilance

Quality Control Processes in Clinical Biochemistry Laboratory

Sneak peek at doctoral research

Translational Research: Closing the gap between Bench & the Bedside

Writing a Narrative Review

Yoga Physiology

Block 2:

Addiction Psychiatry

Airway Management in Adults

Autopsy

Basic trauma Life Support

Cardiology

Cardiothoracic & Vascular Surgery

Clinical Forensic Medicine

Clinical Hematology

Community Ophthalmology

Emergency & Critical Care in Obstetrics

Fetal Medicine

Geriatric Care

Head & Neck Oncology

Neonatal Intensive Care Unit

Nephrology

Neurosurgery

Non-communicable diseases

Oncology

Otology

Pediatric Hemato-oncology

Pediatric Infectious Disease

Pediatric Intensive Care Unit

Patient Preparation for OT In Ophthalmology

Patient safety & quality

Primary health care in community settings

Procedural Dermatology

Pulmonary Diagnostics

Rehabilitation Medicine

Rheumatology

Sports Medicine

Spine Surgery

Surgical Oncology

Surgical skills in orthopaedics

Trauma assessment and resuscitation in casualty

Ultrasound Imaging

Urology
