

## **Anesthesiology Department, KMC, Manipal**

### **1. Why to choose MD Anesthesiology at KMC Manipal?**

Kasturba Medical College Manipal, has always been among the premier institutions in the country, offering Anesthesia degree program. The Masters degree, MD Anesthesiology was started in the year 1975, with its alumni prospering all across the globe. Over the years, the department has grown in leaps and bounds to achieve its present standing. At present, we are admitting 18 MD postgraduate students, in addition to offering a Fellowship program in Pediatric Anesthesiology. Department teaching program is renowned all over the country for its quality. The CME programs (APGAP) conducted by the department once every two years since 1982, has received national acclaim. The Anesthesia postgraduate students are trained in Anesthesiology, Pain Management and Intensive care management. The training is offered in all the subspecialties such as Cardiothoracic anesthesia, Neuroanesthesia and Pediatric anesthesia in addition to anesthesia for the core surgical specialties. With about 2000 surgical procedures per month the postgraduate students receive good clinical exposure.
